

# INVITATION TO THE DANISH GRAPE AND FRUIT GROWERS

## Innovations for a mechanical control and cultivation in orchard and vineyard

**12-09-2017**

*Scandinavia is strongly developing to be the hotspot for new nordic food and the culinary standard for it. New Nordic Gastronomy is already world-reknown and the products of northern fruit including new grape cultivars start to enrich the world. In Scandinavia as well as on the important markets abroad a nature respecting cultivation is of essential importance. In Denmark the organic cultivation of crops is of highest importance and also has a turn-key function to convince all other markets. This event is particularly interesting for all producers aiming for quality fruit - no matter if they produce organic or not.*

**Location** POMETUM - University of Copenhagen  
Agrovej 1, 2630 Tastrup

**Date** Tuesday, 12.09.2017  
**12.00 Lunch option (canteen) · 12.30 Start of demos · expected finish 16.00**

---

**Presenters** Hosted by **TORBEN TOLDAM-ANDERSEN**  
*Supporter of the transition of Danish fruits to higher value.*

**STEFAN BRAUN** - Braun Maschinenbau - CEO and technical innovator  
*His company invented in 1966 the technology to cultivate vines without the use of herbicides.*

**JENS HEINEMEYER** - Consultant for wine processing  
*Strong believer in nordic fruit potentials*

---

**Subjects**

- Demo of tools to cultivate vineyards and orchards to optimum quality result by respecting the nature
- Latest under-vine (or tree, or bush) technology to avoid plant depressions and the use of herbicides.
- Cultivation tools to control the growth of green plants in vineyard and orchard.
- A new cultivator tool to allow the cultivation of typical nordic soils. One basic instrument to: work the soil where suitable, manage and improve seeded or natural greening in the plantation. Suitable and affordable for even smaller productions > one universal tool base.
- Discussion of nordic requirements and wishes for solutions with Stefan and Torben.
- **Additional:**  
Harvest 2017 is approaching. Jens offers a question and answer forum for the relevant items of oenology to produce wines from grapes and indigenous nordic fruits.
