

Follow this guide to install GreenPlan Cloud or GreenLog

1. Use the link to download the installer
2. When the download is complete, click **Open file** to start the installation.
3. **Install the Application:** The installation window will open.
4. Choose the option **Kun til mig (Only for me)**—this means the local Application will be installed just for your user account (not for all users on the computer).
5. Then click **Install**.
6. Once the installation is complete, the local Application will be ready to use.

It is only possible to log in, if you have an AgrolD, which is setup to login to GreenPlan Cloud or GreenLog. Contact Charlotte Holde, HortiAdvice at Chol@hortiadvic.dk, to get a username and password.
