

GreenPlan Cloud Update

We're pleased to announce a release of **GreenPlan Cloud** with several updates and improvements. It will be released on October 27, 2025.

New and updated features

- **New data fields** added in plan and printouts in the **economic** module, including:
 - Net profit per start plant
 - Net profit per years-m²
 - Variable costs
 - Variable costs per sold plant
 - Total costs
 - Total costs per sold plant
 - Profit margin
 - Profit margin per sold plant
 - Net profit
 - Net profit per sold plant

The new fields are not automatically added as columns in the plan, so you must add the ones you think are relevant to you. You will find the new fields under **Columns**.

- **Updated batch analyze** with fixed cost and **key figure** with the new data fields included
- **Standard label printing** – you can now **print a standard label including** a QR code, which can be use together with the new planning App. The app is currently being tested and will be released soon. In the app you will be able to manage your realized batches from the greenhouses.

Crop: Camp 6 cm		
Batch Id	4808	
Start locat...	Gartnerivej	
Start # pla...	28800	
Start # tab...	4	
Phase	Start date	Notes
Propagation	Y25 W45 D1	_____
LD	Y25 W50 D1	_____
Space	Y25 W52 D1	_____
Sale	Y26 W3 D1	_____

Labels can be printed on Zebra printers, and you find the function by right-clicking on a batch.

We're constantly working to enhance performance, security, and user experience. This update is part of our ongoing effort to improve our software.
